

In response to demand, SCHC has added an extended care program to its Powell River facility. This program maintains the structure of the day-to-day routines and includes all non-primary group and one to one activities. Extended care is a good choice for a client who no longer requires the intensity of primary treatment but, due to personal reasons, is not ready to return home. Extended care is provided in a new residence directly behind the medical unit and all rooms are single occupancy.

Included services:

- 24 hour a day nursing support and medication management
- 24 hour a day on call services of physician and psychiatrist
- All psycho-education and lectures
- All large group activities
- All recreation activities, both on and offsite
- All SMART Recovery, Refuge Recovery and 12 Step meetings (offsite transport and supervision)
- Physician appointments as required
- Psychiatric appointments as required (based on post treatment care plan).
- Massage therapy, hypnotherapy, EMDR sessions, laser therapy, ongoing post-treatment planning meetings, family counselling and any other non-primary counselling services offered to facility clients.
- Dietary support for special diets
- Support and transportation to local government offices in order to arrange post-discharge needs.

Services not included:

- Primary counselling assignment
- One to one sessions with an assigned counsellor
- Group sessions with an assigned counsellor
- Reports to outside agencies

Extended care is not meant to be a substitute for sober living. Except for services not included in the extended care program, clients are expected to attend all programming. Clients looking for sober living services will continue to be referred to outside agencies.

Price per day \$300.
